AIMS AND OBJECTIVES:

1. To review the importance of design and preparation of the mouth
2. To discuss the risks factors
3. To review the correct treatment sequence
4. To review more advanced prosthodontic options and alternative treatment modalities
5. To review the maintenance requirements for these patients
6. To have understood a better understanding of partial denture design
7. To have an improved knowledge of the principles and theory of good impression techniques

Graham Stokes is a Worcestershire man born and bred, he now lives in Malvern. He is the senior clinician at LHDP Implant and referral centre in Bromsgrove. He takes referrals in implants and major dental reconstruction work and full dentures. He has been a VT adviser

for 10 years and was the adviser for BDA Advance

He is passionate about dentistry and education and is heavily involved in postgraduate dental education locally and nationally. From 2010 -2014 he sat on the principal executive committee of the British Dental Association's Representative Body and was chair of the BDA's Health and Science committee from 2010-2015. He is still a member of the Health and Science committee and a member of the BDA's English and UK Councils representing the West Midlands.

He is a special adviser and clinical lead for the dental charity Bridge2aid providing education and dental care to some of the poorest people in the world in Tanzania.
