## Speakers:

**Sanjay Sharma** MD FDSRCS FRCS, is the Lead Clinician and Consultant Oral and Maxillofacial Surgeon at the University Hospital Southampton NHS Foundation Trust and The Royal Hampshire County Hospital in Winchester. He trained at King's College London and St Bartholomew's Hospital to achieve his dual qualification status. Sanjay was awarded his Doctorate in Medicine in 2008 for his work on the genetics of cancer growth and he consolidated his interest in facial reconstructive and aesthetic surgery at the world renowned Boston Facial Plastic Surgery and Facial Nerve Centre. He set up the Wessex Facial Nerve Centre to help treat people with facial nerve paralysis. He is a core member of the Head & Neck MDT and the Specialist Skin Cancer MDT. His work involves many aspects of facial reconstructive surgery and operations for skin cancer and melanoma. He set up the new head and neck sentinel lymph node biopsy service which has world class success rates.

His teaching interests include both undergraduate and postgraduate lectures and he has set up the new cadaveric dissection master class courses at Southampton University School of Medicine for GPs and surgical trainees. He has over 50 peer reviewed publications and is actively involved in major stem cell tissue engineering programmes at the University of Southampton.

Sanjay works with a team of highly skilled professionals to obtain the best possible outcomes for his patients

**Madan Ethunandan**, MDS (OMFS), FDSRCS (Eng), FFDRCS (Irel), FRCS (OMFS) (GDC 83060) is a Consultant Oral & Maxillofacial Surgeon in the Department of Oral & Maxillofacial Surgery and Honorary Senior Clinical Lecturer, University Hospital Southampton NHS Foundation Trust, Southampton, UK. He completed his training in the south coast training programme and gained additional experience from MSKCC- New York, Baylor – Dallas, Maryland- Baltimore and AIMS - Kochi. His main clinical interests are head and neck oncology, skull base surgery and surgical dermatology. He is an associate editor of the British Journal of Oral and Maxillofacial Surgery and a member of the editorial boards of the Journal of Maxillofacial and Oral Surgery, Annals of Maxillofacial Surgery, and the International Journal of Clinical Implant Dentistry. He is also the Module Editor (Surgical Dermatology) for E-Learning for Healthcare (BAOMS/DOH) and a reviewer for a number of leading journals. He is the author of almost 60 publications in peer-reviewed journals and contributed book chapters to speciality defining books in maxillofacial surgery. He has given many invited lectures in the national and international forum. He is the lead educational supervisor for senior house officers in oral and maxillofacial surgery.

**Stephanie Hughes**, is a General Practitioner who trained at Oxford University Medical School (graduating in 2000) and who completed her GP training on the South Coast in 2005. Dr. Hughes prides her self on being a true generalist, and on adopting a holistic approach to patients' problems. Her "speciality" within general practice is working with patients towards solving long-standing issues, and/or achieving long-term goals, with which they may have struggled in the past. As well as practising medicine in the NHS and privately, Dr. Hughes is also Associate Dean at Health Education Wessex, and is passionate about teaching medical students and junior doctors. Dr. Hughes has also been an appraiser for 8 years.

## Aims and Objectives

- ◆ To discuss the new referral guidelines and pathways for referral
- ◆ To discuss the role of the multi-disciplinary-team (MDT) in decision making
- ◆ To recognising "potential, early and established" oral cancer lesions
- ◆ To be able to carry out a goal directed systematic examination
- ◆ To discuss the management of oral cancer
- ◆ To discuss the patient journey, the impact of modern lifestyles on disease and methods used in dealing with difficult situations

At the end of the study day, the attendees should be:

- ◆ Aware of the referral guidelines and be able to make an appropriate referral
- ◆ Have a better understand the role of MDT and the decision making process
- ◆ Be confident in carrying out a systematic examination to identify oral cancer lesions
- ◆ Be more confident in diagnosing suspected and established oral cancer lesions
- ◆ Be aware of modern oral cancer management
- ◆ Appreciate the patient's journey from a patient's perspective
- ◆ Understand how modern lifestyles affect the disease process
- ◆ Be aware of strategies to deal with difficult situations
